

How strong is the mesh platform?

At Easy Care Systems, Rapid Ramp's mesh platforms are designed for exceptional strength and durability. Made from galvanized steel, the mesh can support substantial loads, typically up to **1,000 kg (approx. 2,200 lbs)**, making it suitable for both wheelchair users and mobility equipment. The robust construction ensures long-term use in various environments while providing a slip-resistant, weatherproof surface for added safety.
