

# What is a bidet?

A bidet is a bathroom feature designed to clean the genital and anal areas after using the toilet. Originating in France in the 17th century, bidets have evolved from standalone porcelain fixtures to modern, integrated units with advanced features and now we have designed a transportable large capacity bidet called Bidetsy. This standalone bidet requires no installation.

A bidet is also referred to as a handheld sprayer, Muslim shower, shataf, jet sprayer, automatic lota1
